FREE Computer Classes

Almost every job or daily task these days requires some level of computer knowledge. Our introductory courses are for people who have no computer experience or who need a little extra training.

You’ll learn the basics of how to operate a computer, including typing (keyboarding), Internet and email. Later, you can take classes in Microsoft Word and Excel to learn to create simple flyers, spreadsheets and documents like a resume. We also offer computer lab time to gain one-on-one assistance when needed.

We are counting the success stories from many of our students who have completed courses and desire to continue to the next step.

For more information or to learn how to register for a class, please call the SSOH Job Training Center at (334) 683-4666.

Seating is Limited.
